

Fund Summary

The Teucium Wheat Fund (WEAT) provides investors an easy way to gain exposure to the price of wheat futures in a brokerage account.

WEAT: Did You Know?

- Wheat is one of the most important agricultural commodities, used throughout the global economy as food, animal feed, fuel, starch, paper, particleboard, and plastic.
- Demand for wheat is rising exponentially due to world population growth, and the expansion of the global middle class.
- Wheat prices have a historically low correlation with U.S. equities making WEAT a potentially attractive option for portfolio diversification.

Wheat in Your Portfolio

- Commodities typically behave differently than other asset classes and can help enhance portfolio diversification.
- You can segment your commodity exposure (like you do with other asset classes) among various categories such as: Energy, Precious Metals, Agriculture, Industrial Metals, etc.
- WEAT may be held as a core component of your overall exposure to agriculture.

THE PERFORMANCE QUOTED REPRESENTS PAST PERFORMANCE, DOES NOT GUARANTEE FUTURE RESULTS AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE DATA QUOTED. SINCE INCEPTION ANNUALIZED VALUES INCLUDE SEED DATE OF 9.16.2011.

Fund Objective

The investment objective of the Fund is to have the daily changes in percentage terms of the Shares' Net Asset Value ("NAV") reflect the daily changes in percentage terms of a weighted average of the closing settlement prices for three futures contracts for wheat ("Wheat Futures Contracts") that are traded on the Chicago Board of Trade ("CBOT"), specifically (1) the second-to-expire CBOT Wheat Futures Contract, weighted 35%, (2) the third-to-expire CBOT Wheat Futures Contract, weighted 30%, and (3) the CBOT Wheat Futures Contract expiring in the December following the expiration of the third-to-expire contract, weighted 35%.

Fund Holdings

Portfolio Diversification that Grows

[^]The benchmark is TWEAT which is defined on page 2. The Benchmark reflects the futures values based on the CBOT prices, and is as reported by the New York Stock Exchange (NYSE). The Market Price used herein is the actual 4pm close price as reported by the NYSE.

Data Bloomberg Finance L.P.

Definitions

Backwardation: A market condition in which a futures price is lower in the distant delivery months than in the near delivery months.

Raw Beta: The sensitivity measure that estimates the percentage price change of security given a 1% change in a representative market index. Raw beta measures the risk of a security relative to the market (represented by an index).

Chicago Board of Trade (CBOT): A commodity exchange established in 1848 that today trades in both agricultural and financial contracts. The CBOT originally traded only agricultural commodities. Now, the CBOT offers options and futures contracts on a wide range of products including metal, U.S. T-Bonds and energy.

Contango: A condition in which distant delivery prices for futures exceed spot prices, often due to the costs of storing and insuring the underlying commodity. Opposite of backwardation.

Correlation: A measure of how two securities move in the market in relation to one another, i.e.; in tandem or inversely. Correlation is represented by the correlation coefficient, which ranges between -1 and +1. A positive correlation coefficient of +1 implies that as one security moves, either up or down, the other security will move in the same direction. A negative correlation coefficient of -1 implies that if one security moves in one direction the other security moves in the opposite direction. A correlation of 0 means that the movements of the securities are not correlated.

Expense Ratio: Defined as the amount of income (loss) required for the redemption value at the end of one year to equal the selling price of the Share, as presented in the Form S-1 dated April 29, 2019.

Intraday Indicative Value (IIV): An Intraday Indicative Value is published by NYSE Alternext US for each Exchange Traded Product (ETP) as a reference value to be used in conjunction with other ETP market information.

Market Price: The current price at which shares are bought and sold. Market returns are based upon the last trade price.

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

Roll: When an investor replaces an existing futures position with a new one having a later expiration date.

S&P 500: SPX Index - An investment cannot be made directly in an index. Stocks in this example are represented by the Standard & Poor's 500, which is an unmanaged group of securities and considered to be representative of the stock market in general.

Spot: The futures contract month nearest expiration and delivery month for futures contracts.

Teucrium Wheat (TWEAT) Index: A weighted average of daily changes in the closing settlement prices of (1) the second-to-expire Wheat Futures Contract traded on the CBOT, weighted 35%, (2) the third-to-expire CBOT Wheat Futures Contract, weighted 30%, and (3) the CBOT Wheat Futures Contract expiring in the December following the expiration month of third-to-expire contract, weighted 35%. To convert to an index, 100 is set to \$25, the opening day price of WEAT.

Risks and Disclosure

• *Commodities and futures generally are volatile, and instruments whose underlying investments include commodities and futures are not suitable for all investors.*

• *This material must be preceded or accompanied by a prospectus. Please read the prospectus carefully before investing. To obtain a current prospectus visit the link below:*

www.Teucrium.com

• *The Fund is not a mutual fund or any other type of investment company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to regulation thereunder.*

• *Because the Fund will invest primarily in wheat futures contracts and other derivative instruments based on the price of wheat, an investment in the Fund will subject the investor to the risks of the wheat market, and this could result in substantial fluctuations in the price of the Fund's shares.*

• *Shares of the Fund are not insured by the Federal Deposit Insurance Corporation ("FDIC"), may lose value and have no bank guarantee.*

• *Unlike mutual funds, the Fund generally will not distribute dividends to its shareholders. Investors may choose to use the Fund as a means of investing indirectly in wheat, and there are risks involved in such investments.*

• *Prior to the launch of the Teucrium Corn Fund, Teucrium Trading, LLC had never operated a commodity pool. Investors may choose to use the Fund as a vehicle to hedge against the risk of loss, and there are risks involved in such hedging activities.*

• *This material is not an offer or solicitation of any kind to buy or sell any securities outside of the United States of America.*

• *Diversification does not ensure a profit or protect against loss.*

The Teucrium Funds have a patent on certain methodologies employed by the Funds.

Foreside Fund Services, LLC is the distributor for the Teucrium Wheat Fund.
